

# ***TIRED*** OF THE SAME ***OLD PHONE SYSTEM*** ***OFFERING?***

Over the last few years there have been more PBX Vendors/Manufacturers offering new products than ever before. In the end, however, they all seem to offer the same things. They sell you, the reseller, the hardware, phones and software. You then spend countless hours and days setting up and customizing the solution for your customer.

Not anymore. With PBXact you get the first true turnkey solution that is as easy as 1-2-3.

1. Plug in the PBX

2. Plug in the phones

3. Train the customer on  
using their new PBX

**Want to save real labor cost?** With PBXact you get a true turn key solution so you can focus on user training and selling more PBXs. Let's face it; the key to success in this cutthroat business is to keep the labor cost down on the setup of phone systems. With our revolutionary provisioning process, you simply answer a series of questions at the time of placing the order and sit back and wait for the PBX and phones to be delivered fully configured and ready to go. The best part: all of this is brought to you at a price that allows you to be profitable and save your customer money.

**Want to take a much needed vacation?** No problem with PBXact's flex-time. We allow our resellers the much needed vacation they need without worrying about how to support their demanding customer needs. That's right. With each PBX system you get up to 5 hours of any-time-any-type of direct user support from our great support staff. So now you can enjoy that vacation knowing that we have your back covered in case of an emergency.

**Want professional user guides and sales literature?** Most PBX vendors will give you some form of sales literature and user guides, but will they customize it to your unique business needs? Our graphics department creates customized literature for your company, including your logo and contact information. Thinking about running a mailer campaign? Don't worry about designing that flyer. Just contact us and our experienced marketing team will work with you to design a campaign around your individual local market needs and supply your local printer with all the correctly formatted files. We free you up by doing all work, allowing you the time to dream up the local marketing campaigns.

**Want notifications on system problems before the customer may even know they are having problems?** With our revolutionary software you get email alerts for system issues or PRI failures. We believe in pro-active customer service. That means fixing problems before the customer knows there is a problem. Our approach leads to long-term customer relationships, giving you more options for long term recurring revenue.

**Disaster Discovery, Disaster Discovery, Disaster Discovery!** You and your customer can relax at night knowing that their complete phone system is being backed up to our data center on a nightly basis. Now that's real disaster recovery. In the event of a fire or total system failure we can ship you a fully configured replacement PBX with all the customer's settings and voicemail the same day.

**Features, Features, Features!** We have more standard features than you could ever dream of and we release new features on a regular basis. With our optional future-proof packages, your customer can relax knowing that their system will always have the newest cutting edge features. We are industry leaders in designing ways to make features easier to use for the end-user. After all, a great feature is useless if the end-users don't know how to use it!
